

U.S. CUSTOMS AND BORDER PROTECTION (CBP) AWARDS SOLE SOURCE PROCUREMENT TO VIRTUALAGILITY FOR WORKCENTER 4.0 AND VOC SOLUTIONS

WINCHESTER, MA. **September 2008** U.S. Customs and Border Protection, a division of the Department of Homeland Security, has determined that VirtualAgility manufactures and supports the systems necessary to integrate its CBP Application Integration Portal (CAIP) and Enterprise Service Bus--as well as to build collaboration platforms across the CBP environment.

These VirtualAgility products have been evaluated, are in use in the CBP production environment, and are in process to be added to the CBP Technical Reference Model (TRM).

VirtualAgility WorkCenter 4.0 and VirtualAgility OPS Center (VOC) portal are enterprise-wide Web 2.0 SOA solutions that enable most disparate organizations to achieve unprecedented levels of interoperability. These systems can be deployed rapidly and without disrupting operations. VirtualAgility's open-standards technology can connect non-compatible systems to create a common operating picture. They can also enable cross-department information sharing without duplicating or compromising source data. VirtualAgility platforms preserve the integrity of proprietary databases while they streamline collaboration, communications and situational awareness.

"This award recognizes our technology's one-of-a-kind capabilities," said VirtualAgility president Stuart Rudolph. "We appreciate CBP's confidence in Virtual Agility to solve multiple, complex information-sharing challenges and are honored that we can help support CBP's critical mission."

###

About VirtualAgility

VirtualAgility continues to apply its robust line of SOA solutions to the needs for improved situational awareness and coordination within and among agencies to organize, plan and track operational activities. To achieve the next level of virtual agility, collaboration and information sharing, VirtualAgility can be laid over existing "stovepipe" solutions without disrupting day-to-day operations. VirtualAgility delivers easy- to-use, quick-to-install Web 2.0 solutions for creating interoperability, coordination and business continuity in government and industry.
